INDUSTRIAL PAINTING

Benning's Painting, Inc., has had the opportunity to brighten up many manufacturing type work environments by simply painting the ceiling and walls. In addition, we can assist with OSHA compliance by color coding the different delivery systems for gas, air, waste, and different types of water including fire lines. Benning's special foam cleaning procedures have enabled us to be of service in some of the dirtier environments, for example bag insulation, structural steel and metal decking exposed to airborne cutting oils.

SERVING THE PAINTING INDUSTRY SINCE 1982
